WORK EXPERIENCE

Chegg-India

Oct 2021 - Present

- Subject Matter Expert in Computer Science
- I've helped many students and developers by answering their questions.

Connect Bees (Internship)

July 2022 – Sept 2022

- Worked as Frontend Developer Intern
- Created a landing page for this Startup Company.
- Used React.js framework for development.

PROJECTS

YourVdeos

- Created a YouTube replica using React.js, Google Firebase, Tailwind CSS and Rapid API to enhance data retrieval and enrich the user experience.
- Offering features like trending videos, liked video, history tracking, subscribed channel tracking, light-dark mode toggling and secure user authentication, ensuring a captivating and personalized experience for every user.

Blogspedia

- Developed a blogging website using React.js for frontend, and integrated Google Firebase for data storage, authentication, and hosting functionalities.
- A user-friendly platform allowing users to signup/login securely, write, edit, and publish blog posts, with data stored efficiently using Google Firebase.

Lab Partner

- Created a solution based platform using React.js for frontend development and Google Firebase for data storage.
- It's responsive and user-friendly interface, providing solutions for labs and assignments. Additionally, the website includes an autotyper to enhance user productivity.
- It was a team project and I've developed feedback form, slider and code page.
